

Rule 30: $L \oplus (C \vee R)$

❑ CF DETECTS COUPLING

Non-affine (contains OR gate)

Walsh: $\hat{f}(\{L\}) = -\frac{1}{4}$, $\hat{f}(\{R\}) = -\frac{1}{4}$

$CF_2(L) = 0.19$ $CF_2(C) = 0.05$ $CF_2(R) = 0.31$

Rule 150: $L \oplus C \oplus R$

❑ CF BLIND (requires CF_3)

Affine over $GF(2)$ (pure XOR)

Walsh: $\hat{f}(\{L\}) = 0$, $\hat{f}(\{C\}) = 0$, $\hat{f}(\{R\}) = 0$

$CF_2(L) = 0.00$ $CF_2(C) = 0.00$ $CF_2(R) = 0.00$
